

## Juke Box E

**„...we would recommend it as a complete system for beginners.“**

Great entry-level concept with record player, phono preamplifier, integrated amplifier and Bluetooth receiver. The Juke Box E needs only speakers to get started. As a record player convincing, we would recommend it as a complete system for beginners. This is truly Plug and Play.

Other analogue sources can be connected via the RCA input or play via Bluetooth. The resulting system is limited, but nice and uncomplicated and compact. The Juke Box E shows that as a beginner you do not have to be afraid of complicated setups.
